

ADVISORY BOARD MONTHLY UPDATE: NOVEMBER 2016

Thanks again for attending a productive session on Nov 4. This is just a brief communication to let you know that the meeting notes will be posted to the SDC website <http://sdc.wsu.edu/overview/advisory-board/>. They are also attached here for your reference. Phil has also shared the power point used at the meeting.

A few highlights and actions items from our meeting:

Student Video: I think we all agreed that the video by Kyle Redzinak (<http://sdc.wsu.edu/blog/we-are-sdc-see-the-story-behind-the-school/>) has been a smash hit and that we should be doing more to support additional videos. The videos not only have an impact on student recruitment, but can also be a useful tool for recruiting new board members, other board initiatives and fundraising efforts. Please continue to discuss video ideas with your program boards and feel free to share your them with Phil, Jim and me.

Virtual Lab: As Phil noted at our meeting, we are almost there. We can finish this project within the budget if all advisory board members meet annual contribution goal of \$500 each.

Contributions: I will follow up with some of you to confirm and track progress on board member contributions. As discussed at the meeting, this is critical to membership on a board and must be complied with. I can say on behalf of the LA board, we've made real progress in little over a week and after making a direct appeal to individuals. I would highly encourage all of you to do the same with your boards.

And lastly, be sure to mark your calendars for the Spring Meeting on March 2 & 3. The draft agenda we developed at our meeting is attached. In general, plan to take the early flight to Pullman on Thursday Mar 2 and leave on the late flight on Friday Mar 3 (unless you plan to stay over for the weekend).
