

Interior Design

Interior Design (ID) a four-year program structured into one year of pre-professional coursework and three years of major (professional) coursework. Professional program courses begin in second year fall. Due to the sequential nature of courses there are not spring admits. To be considered for admission into the ID program, a student must completed the pre-professional coursework below * (or their approved equivalents).

Students not meeting the admission to major criteria below will be considered until enrollment limits are reached. Average enrollment limits into the second year of the Interior Design major are 25-30 students. Greater emphasis is given to performance in SDC 100, 120, and 140. Completion of all pre-professional coursework does not guarantee acceptance into the professional program. Students are encouraged to work with SDC advisors to identify an alternate major should they not be admitted to their primary choice of major.

Students are required to earn a grade of C or better in all major courses required for the degree.
